INDUSTRY EXPERIENCE

UI Engineer II
CrowdStrike

📅 September 2022 - Present   📍 New York, NY (Remote)

Ember.js | React.js | Tailwind CSS | Next.js | TypeScript

- Upskilled on Ember.js and developed a customer-facing application to manage an end-user's CrowdStrike subscriptions, payment methods, and more.
- Modernize CrowdStrike's e-commerce capabilities through the design and development of the new-and-improved CrowdStrike Store.
- Implemented a new headless checkout experience within our e-commerce store using React.js, Next.js, and Tailwind CSS.
- Support the ongoing development of the company's flagship product, the Falcon Console, by contributing front-end components, bug fixes, and data analytics.
- Collaborate alongside the Intel Recon team in providing product analytics and event tracking metrics through the Amplitude Analytics Platform.

Web Engineer III
American Express

📅 August 2021 - September 2022   📍 New York, NY

React.js | Chakra UI | Tailwind CSS | Next.js | TypeScript

- Incrementally redeveloped the LoungeBuddy.com home page atop a more modern stack of technologies including Tailwind CSS, Next.js, and more.
- Leveraged latest best practices for both front-end (React.js, Next.js, TypeScript) and backend facing technologies (Node.js, Express) through the development of an updated Promo Code Tool.
- Streamlined the customer support process by creating a system to create, schedule, and manage promo codes as well as support tracking of their metrics.
- Developed a set of reusable components based on the LoungeBuddy Design System for reuse across all LoungeBuddy web properties, accelerating time-to-market period for supported features in the future.

Front-End Engineer & Product Manager
Hoffman Strategy Group

📅 June 2020 - May 2021   📍 Lincoln, NE (Remote)

React.js | Material-UI | Amazon Web Services | JavaScript

- Steered the product vision for the new Hoffman Analytics software subsidiary.
- Refactored a pre-existing JavaScript codebase to improve maintainability and scalability.
- Leveraged React.js and Material-UI to redevelop the front-end for a real-estate data analytics platform, improving the user experience and consolidating stakeholder processes.

EDUCATION

B.S. Software Engineering
Minor in Mathematics
University of Nebraska-Lincoln

📅 August 2017 – May 2021
Cumulative GPA: 3.64 / 4.00

SKILLS

React.js | Next.js | TypeScript
Tailwind CSS | Chakra UI | Material-UI
React-Query | Recoil.js | Contentful
Sanity.io | Node.js | Express | Python
Git | SQL | NoSQL | Playwright

PROJECTS

Currently Working With

Ember.js | React.js | Next.js
TypeScript | Tailwind CSS | Contentful

RyanMeetup.com
Personal Project

🔗 ryanmeetup.com

- Is your name Ryan? Wanna meet other Ryans? Join the Ryan Meetup!

Tailwind Portfolio
Personal Project

🔗 ryanle.dev

- A newly-revised version of my personal portfolio page built with Talwind CSS alongside Contentful.

CrowdStrike Ecommerce Store
CrowdStrike

🔗 store.crowdstrike.com

- Looking for some endpoint protection? CrowdStrike's got you covered. I worked on the headless checkout portion of our ecommerce store.

LoungeBuddy Redesign
American Express

🔗 loungebuddy.com

- Redeveloped the LoungeBuddy website from the ground up on a modern technology stack.
