INDUSTRY EXPERIENCE

Co-Founder // Chief Operations Ryan

Ryan Meetup

📅 February 2023 - Present 📍 Brooklyn, NY (Remote)

- Co-founded and scaled a global not-for-profit community spanning 16+ chapters, 45+ countries, and 40+ events, reaching thousands of attendees worldwide.
- Drove sustained social media growth and visibility, building an audience of 112K+ online followers and generating 10M+ monthly impressions across all platforms.
- Led strategy, logistics, and operations for free, large-scale public events across the US while under tight financial constraints.
- Managed large-scale brand partnerships and co-branded collaborations, overseeing the execution of sponsored media and experiential event activations while preserving core brand identities.
- Architected and maintained the organization's web properties, engineering custom internal platforms - accelerated by agentic AI workflows - to streamline operations and replace costly third-party SaaS dependencies such as QuickBooks, Jira, and more.

UI Engineer II

CrowdStrike

📅 September 2022 - Present 📍 Brooklyn, NY (Remote)

- Spearheaded UI development for Raven Next platform rebuild, delivering 25+ features that modernized microservice management workflows and reduced support tickets through enhanced self-service capabilities for 1,000+ engineers.
- Led the end-to-end migration of a mission-critical configuration service, deprecating the legacy system ahead of scheduled with zero rollbacks.
- Built and standardized core UI component libraries, driving organic, zero-friction adoption by external engineering teams across the organization.
- Architected a real-time dashboard suite for Raven Next, including microservices monitoring, platform alerts, changelog tracking, team activity feeds, and more to centralize critical operational data at a glance.

Web Engineer III

American Express

📅 August 2021 - September 2022 📍 New York, NY

- Redesigned LoungeBuddy.com's homepage using modern technologies like Next.js and Tailwind CSS, improving performance, maintainability, and developer experience.
- Streamlined customer support workflows by introducing a system to manage promo codes and monitor usage, reducing manual overhead.
- Developed reusable UI components aligned with the LoungeBuddy Design System, accelerating development across all web properties and ensuring design consistency.

EDUCATION

B.S. Software Engineering Minor in Mathematics

University of Nebraska-Lincoln

📅 August 2017 - May 2021

Cumulative GPA: 3.64 / 4.00

SKILLS

React.js, Next.js, TypeScript, Tailwind CSS, Playwright, Contentful, Sanity.io, Node.js, Python, GraphQL, Event Planning, Community Building, Brand Management, Agentic Workflows

PROJECTS

Currently Working With

React.js Next.js TypeScript
Tailwind CSS Contentful GraphQL
Playwright Claude Code

Raven Next

CrowdStrike

- Building the next evolution of CrowdStrike's internal developer platform.

Ryan Meetup Tasks

Ryan Meetup

- Ryan Meetup has grown so much that we need our own project management software now.
- I refuse to pay for Jira/Trello/similar solutions for our org, so I built my own.

RyanMeetup.com

Ryan Meetup

🔗 ryanmeetup.com

- Our central hub for all things Ryan. Check out upcoming events, previous press coverage, Ryan Meetup around the world, and much more.

TallyApp

Personal Project

- My personalized finance tracking app, since I don't want to pay for Monarch Money or other similar solutions.
